

## About me

I'm a Junior Front End Developer making a professional change and after studying web programming, I am looking for my place in the IT sector.

I have done an 8-month bootcamp where I have learned HTML5, CSS3, Sass, Bootstrap, Javascript ES6 and React.

In turn, the training provided me with good practices such as Clean Code, methodologies such as Agile and knowledge of GIT version control.

I am looking for an opportunity to evolve in the world of web programming.
