About me

I'm a fullstack developer looking for my place in the IT sector.
I`ve done a frontend bootcamp where I`ve learned HTML5, CSS3, Sass, Bootstrap, Javascript ES6 and React.
And a backend bootcamp where I`ve learned NodeJS, express, typescript, socket.io, MySQL and NoSQL.
In turn, the training provided me with good practices such as Clean Code, methodologies such as Agile and knowledge of GIT version control.
I am looking for an opportunity to evolve in the world of web programming.
